

Self **Ordering** Kiosk

Automating the Ordering Process to
Boost Turnover & Reduce Costs...

How Do Self - Ordering Kiosk Systems Work?

with a self-ordering kiosk, customers can browse your menu, place their orders and pay easily. Customers can dine-in or take away and pay either UPI, cash or card. The self-service ordering kiosk communicates to BVC POS seamlessly so any orders are printed to the kitchen printer or showed at the kitchen display.

Seamless Customer Experience

**1****Touch to Begin****2****Choose to Dine-in or Take Away****3****Customize Dishes (Item Modifiers)****4****Confirm Order****5****Choose Payment Method & Pay****6****Get a Receipt**

Benefits of **BVC Kiosk**

How Self - Ordering technology is transforming your restaurant & canteen?

01

Increase Sales

Push targeted and intuitive prompts such as special promotion and upsell tactics as guests are building their orders.

02

Shorter Wait Times

A fast, easy way for customers to enter their own order, make their payment, get their orders, and be on their way.

03

Fully Automated

Allow customers to access the menu, place orders, edit items and complete orders without staff intervention.

04

Reduce Labor Cost

Flexible to move the staff around by reassigning to other positions that helps to improve the customer experience and improve sales

05

Guarantees Order Accuracy

Eliminate human errors in orders and miscommunication as customers are selecting and submitting their own orders.

06

Keep Staff and Customer Safe

Allow customer to place their order and send directly to the kitchen without an in- person interaction with staff.
